

FIREARMS

One Nation is very concerned about the contents of the recently released National Firearms Agreement. The new agreement will have huge impacts on sporting shooting clubs and their members, primary producers, as well as all other law abiding Queenslanders who use or own firearms for sport or recreation.

How can the Palaszczuk Government justify taking away a fundamental tool-of-trade for primary producers by signing up to this new agreement? Unacceptably, the Queensland Government has signed the NFA—showing a total disregard for sporting shooters. One Nation will stop making criminals out of licensed gun owners and will continue to consult with all stakeholders.

One Nation will:

- Legislate for a general firearms amnesty for any person who wishes to surrender a firearm, or register an unregistered firearm.
- Streamline the current system of firearms licensing to make legitimate gun ownership less costly and less convoluted.
- Standardise all firearm licenses to a 10-year renewal with no increase in fees.
- Review the Weapons Act and Regulations and Weapons Categories Regulations in consultation with all stakeholders and industry experts within the first year of forming government.
